Technical Report for RADCON Training
In the Period From 1st April 2004 to 30th November 2006

This report covers the training activities during the period from 1st April 2004 to 30th November 2006 containing the first, second, and third training cycles. A separate technical report of TOT will be issued after finishing the TOT of Fayoum faculty of agriculture. The main objective during this period is to train the extension officers and researchers on using RADCON. The sites of trainees were selected according to the list obtained from CAAES and Central Administration of Research Stations and confirmed by the project steering committee.

1. Overall Objectives

The overall objectives during the first, second, and third training cycles were as follows:

- Training on overall computer system components, fixing common computer faults, formatting hard disk, installing Microsoft windows and derivers and service pack, installing antivirus software and using it, and training on IMARK-Electronic Document Management.
- Introduction to computer operation: windows, web browsing, e-mail, MS-Messenger, operating RADCON modules: forum, news and events, browsing and searching the extension documents, statistical databases, grower problems and expert systems.
- Reviewing the usage of VERCON modules, address real problems that already faced VERCON users gathered from different sites and respond to any issues upon the request of the trainees.
- Training on using MS-front page, covert extension documents to HTML file, uploading extension document to the server.
- Monitor the RADCON activities in the extension centers, agriculture directorates, central administrations, research stations, research institutions, and media support centers to solve any problems that could have occurred during operation, and to train attendees on any new features that could have been added to the system.

3

2. Training Methodology

- The training courses have been conducted using lectures, hands on, and discussion.
- Material is to be distributed (hard copy and soft copy on CD) to the trainees in the beginning of each training period.
- The trainees do their practical training according to the instruction of the trainers by using one computer for one/two trainees.
- At the end of each training period, evaluation should be done. The evaluation would be done in two ways. The first way, a quiz must be done to indicate the outcome of the training. The second way, a questionnaire would be done to clarify the positives and negatives of the training and the future prospective to improve the coming training courses in that concern.
- The training day start from 9 am to 3:30 pm with an half hour coffee break

3. Selection of Trainees

Selection of trainees during the first, second, and third training cycles was as follows:

- Extension centers, agriculture directorates, and specific research stations according to the list obtained from CAAES and Central administration of research stations and confirmed by the project steering committee.
- Research Institutes, Media Support Centers, and Rice Research Center.

Using RADCON	**Three Research Stations**: El-Serw (field crops), El-Serw (animal production), and Seds (animal production). **Two agricultural directorates**: Sohag (2 E.C), and Domiat (4 E.C.)	22	26th Mar– 6th Apr 2006
Using RADCON	**Two Research Stations**: Bahteem (field crops), and El-Mataana (field crops). **Two agricultural directorates**: El-Kaliobia (4 E.C.), and Kena (3 E.C).	22	9th – 20th Apr 2006
Using RADCON	**Seven Research Stations**: El-Kharga (field crops), Kafr El-Hamam (field crops), Kom Oshem (field crops), Toshki, Enshas (animal production), El-Sabheya (animal production), and Sakha (animal production). **One agricultural directorates**: El-Wady El-Gedid (1 E.C and Toshki), an E.C. from Ismailia	22	18th– 29th Jun 2006
6 Workshops	Kafr El-Sheikh, Nubaria, Asuot, Dakahlia, Matrouh, Manofia, El-Menia, North Sina Governorates	About 68 for each workshop (408total)	Jan. – Jul. 2006
6 Workshops	El-Behera, El-Ismailia, El-Fayoum, El-Sharkia, El-Gharbia, Bany Sweaf, Sohag, Domiat Governorates	About 62 for each workshop (372 total)	Jan. – Jul. 2006

5. Performed Training Cycles

The three training cycles were conducted as a consequence of LOA with AERDRI, and two LOA with FCRI. Three Governorates (Behera, Ismailia, and Fayoum) obtained training on Using RADCON in June 2004 (before signing the first LOA) and funded by ARC, the following table shows the details of this training:

7

Course Title	Site of Trainees	Number of trainees	Period
Using RADCON	- Behera agriculture directorate (8 E.C) - Sabheya (field crops) research station	20	29th May – 7th Jun 2004
Using RADCON	- Ismailia agriculture directorate (2 E.C) - Fayoum agriculture directorate (3 E.C.) - Kassaseen research station (horticulture) - Kom Oshem research station (field crops)	16	12th – 21st Jun 2004

6. Summary of the performed training

Training Courses

The following training courses have been conducted:
- Using RADCON (VERCON Modules)
- Refreshment Training on Using RADCON
- Maintenance of Common Computer Operation faults
- Training of Trainers (TOT)
- Publishing of Extension Documents through RADCON

---

[2] Three sites sent one trainee only (instead of two): El-Serw (field crops) research station, Domiat and Sohag agriculture directorates
[3] It is instead of Kom Oshem research station because the last has been trained before.
[4] Sakha (animal production) research station sent one trainee only.
[5] There is not E.C. in Toshki.

10

Training on Using RADCON (VERCON Modules)

This course has been conducted for the following sites:

- 16 Agriculture Directorates (AD)
- 70 Extension Centers (EC)
- 28 Specific Research stations (SRS)
- 6 Research Institutes (Field Crops, Horticulture, Animal Production, Plant Diseases, Plant protection, and Soil & Water)
- Rice Research Center
- 31 Sites in 31 villages in 4 Governorates (Asuot, Kafr El-Sheikh, Dakahlia, and Nubaria)

Refreshment Training on Using RADCON

This course has been conducted for the following sites:

- 7 Agriculture directorates
- 46 Extension Centers
- 6 Specific Research Stations

Maintenance of Common Computer Operation faults

This course has been conducted for the following sites:

- 6 Agriculture Directorate
- 39 Extension Centers
- 4 Specific Research Stations

Training of Trainers (TOT) on Using RADCON

This course has been conducted for the following sites:

- 7 Faculties of Agriculture (Alexandria, Asuot, Mansoura, Ismailia, Kafr El-sheikh, Damanhour, and El-Arish)
- 3 NGO's (CARE, Agricultural Cooperative, and El-Zohuor Association for Women)

A separate technical report about TOT will be issued after conducting the training of Fayoum Faculty of agriculture.

Training on Publishing of Extension Documents through RADCON

This course has been conducted for the following sites:

- 3 Media Support Centers (Dekernis, Ismailia, and Mallawy)

Monitoring Meetings

- 36 monitoring meetings have been conducted during the first, second and third training cycles.
- 8 monitoring meetings have been conducted in the interval between the first and second training cycles and funded from petty cache not through LOA.
- 4 monitoring meetings have been conducted after the third training cycle.
- Total number of monitoring meetings is 48.

Number of participants in monitoring meetings is about 160 from AD, EC, SRS, RI, RRC, Central Administrations.

7. Problems confronted the training process

- **Delay of delivering the equipments:** the policy of distributing the equipments to the sites is that, as soon as certain sites obtain the 'Using RADCON' training course, the equipments should be established in these sites so that the trainees apply what they learned on their jobs. The delay of delivering the equipments caused in delay the training for about four months in the first training cycle.
- **Most of trainees have not any background about computers:** this point has been overcome by increasing the number of training days allocated to the introduction to computer operation.
- **Most of trainees are not familiar in English:** the problem is that the training course contains three units from the module 'management of electronic documents' of IMARK which have been written in English, this entail increasing effort during training. Translation and adaptation IMARK to Arabic is required to increase training efficiency.
- **Some of trainers have not enough expertise about the training process:** the national consultant who frequently attends the training and guides the trainers has solved this point.
- **Some trainees who come from faraway Governorates such as El-Wady El-Gedid, Toshki, Kena, Matrouh, and Sohag ask if the incentive (100 L.E) of attending follow up meeting can be increased because it does not cover the traveling cost:** Dr. Mahmoud Rafea, NPD promised that this request will be discussed in the next executive committee.
- **The terms of payment in LOA mostly consist of 4 installments, the interval between finishing the activities of an installment and reaching the installment to the account of CLAES or FCRI takes about 4 – 6 weeks. This entail halt the training during this period:** it is better that the terms of payment become 2 or 3 installments.

8. Best Practices In The Three Training Cycles

- Nine training periods on using RADCON, 6 refreshment-training periods on using RADCON, 3 training periods on Maintenance of common computer operation faults, and one training period on Publishing Extension Documents through RADCON have been conducted through this interval.
- 48 workshops have been conducted for the extension officers and researchers to solve any problems that could have occurred during operation, and to train attendees on any new features that could have been added to the system, and also to monitor the RADCON activities in the extension centers, agriculture directorates, central administrations, research stations, research institutions, and media support centers.
- Number of extension centers participated in RADCON was 26 at the beginning of the project. Number of extension centers becomes now 96.
- Number of agriculture directorates was 3 at the beginning of the project. Number of agriculture directorates becomes now 19.
- Number of specific research stations was 3 ate the beginning of the project. Number of specific research stations becomes now 31.
- Decreasing the rate of troubleshooting of the computers in the extension centers and agriculture directorates who have obtained training on maintenance.
- As an example of the effectiveness of the training is that the total number of the agricultural problems that have been solved and published through RADCON is 6290. The number of production problems is 5637 distributed as follows:

Kafr El-Sheik	1734
Asuot	1060
Nubaria	480
Ismailia	407
Fayoum	444
Behera	439
Sharkia	141
Dakahlia	276
Manofia	223
Matrouh	21
Bany Sweef	184
Domiat	2
Menia	4
